DETAILED ACTION

Drawings

The drawings are objected to because cross-sectional figures showing insulative and conductive materials (Fig. 2) should be cross-hatched appropriately. Please refer to MPEP 608.02. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Siems et al. (US 5,470,253).

Regarding claim 1, Siems et al. disclose an electrical cable (Fig. 3) comprising:
two differential transmission signal wires 48 having respective cores wires 50
each with an outer insulating covering 52;
a signal drain wire disposed 49 disposed adjacent to the differential transmission
signal wires at an equal distance from each of the differential transmission signal wires;

Art Unit: 2833

a shielding 56 covering that surrounds the differential transmission signal wires and single drain wire;

an exposed area at a terminal part of the electrical cable;

a heat-shrink tube 60 covering an end portion of the shielding covering, except for a front end portion of the differential transmission signal wires and drain wire, so that mutual distances between the differential transmission signal wires and the signal drain wire inside the electrical cable are maintained.

Regarding claim 6, the method for terminating the cable is inherent to the structure of the terminated cable.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Siems et al. as applied to claim 1 above.

Regarding claims 2-4, Siems disclose the invention substantially as claimed, but do not specifically disclose the shielding and insulating materials used in the cable. It would have been obvious to one having ordinary skill in the art at the time the invention was to use the claimed materials, since it has been held to be within the general skill of

Art Unit: 2833

a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 124 USPQ 416.

Regarding claim 5, Siems et al. discloses the drain wire being located in a position that is separated from the core wires of the differential transmission signal wires by a distance corresponding roughly to the thickness of the outer insulating covering of the core wires.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ann M McCamey whose telephone number is (703) 305-3422. The examiner can normally be reached on M-F 9-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula A. Bradley can be reached on (703) 308-2319. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7722 for regular communications and (703) 308-7722 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
